Reviewer's report

Title: Mitral valve repair in a patient with absent right superior vena cava in visceroatrial situs solitus

Version: 1 Date: 16 August 2012

Reviewer: Masafumi Sato

Reviewer's report:

Absence of right superior vena cava with persistent left vena cava in visceroatrial situs solitus is rare.

The author reported a patient with this anomaly who underwent mitral valve plasty for severe mitral regurgitation.

This is well-written and useful contribution to medical knowledge and deserves to be published.
