Reviewer's report

Title: Polyglycolic acid sheet with fibrin glue potentiates the effect of a fibrin-based haemostat in cardiac surgery

Version: 1 Date: 15 January 2014

Reviewer: giovanni cagnoni

Reviewer's report:

1) A more elevated number of cases for each experiment could give more statistical power but this in vitro demonstration of the effectiveness of Polyglycolic acid sheet is really far away any real intraoperative scenary with a wet field.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
