Reviewer's report

Title: Polyglycolic acid sheet with fibrin glue potentiates the effect of a fibrin-based haemostat in cardiac surgery

Version: 2 Date: 11 April 2014

Reviewer: giovanni cagnoni

Reviewer's report:

No Major Compulsory Revisions or minor essential revisions are required

I think as a discretionary revision in "Conclusion" is important to stress again the concept that this is an experimental model, far away from a real surgical field.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
