Reviewer's report

Title: Aortic coarctation: guidelines mismatch across the ocean

Version: 1  Date: 21 October 2013

Reviewer: David Balzer

Reviewer's report:

Major Compulsory Revisions: none
Minor Essential Revisions: none
Discretionary Revisions:
1. Could the authors speculate on the hemodynamic effects of a "pseudo-coarctation"; what are the effects on afterload to the LV? could this play a role in the development of the AR?

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Declaration of competing interests:
