Reviewer's report

Title: Impact of completeness of revascularization by coronary intervention on exercise capacity early after acute ST-elevation myocardial infarction

Version: 3 Date: 11 November 2013

Reviewer: Francesco Saia

Reviewer's report:

The Authors have addressed all comments raised by this Reviewer.
In my opinion the manuscript is now suitable for publication pending the following discretionary revision:
- During the process of revision, the results of the PRAMI trial were presented at the annual ESC meeting and published on the N Engl J Med. 2013 Sep 19;369(12):1115-23. I strongly suggest the Authors to update their discussion based on the results of this trial.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no conflict of interest related to this article to disclose
