Reviewer's report

Title: Spontaneous Corneal Melting in Pregnancy: A case report

Version: 5 Date: 19 October 2007

Reviewer: Christopher Starr

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General

-------------------------------------------------------------------------------

Revisions necessary for publication

The picture looks like the area of melt may be neurotrophic .. was the corneal sensation tested? This should be noted in the report.

What next?: Accept after minor revisions

Quality of written English: Needs some language corrections before being published
