Reviewer's report

**Title:** Ocular Pathology of Uncommon Hematologic Malignancies: Report of Two Cases

**Version:** 2 **Date:** 8 October 2007

**Reviewer:** Nathan Radcliffe

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

**Comments to authors:**

In their article “Ocular Pathology of Uncommon Hematologic Malignancies: Report of Two Cases,” Head et al present ocular involvement in lymphomatoid granulomatosis and chronic myelomonocytic leukemia. Reports of ocular involvement in these diseases are very rare. In particular, the clinical photographs of conjunctival involvement in lymphomatoid granulomatosis will be helpful in educating ophthalmologists and other physicians on one possible presentation of this condition.
