Reviewer’s report

Title: Giant Cutaneous Horn in an African Woman: A Case Report

Version: 2 Date: 9 October 2007

Reviewer: Jimmy James

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General: A well written and researched paper with an excellent post operative result.

It is a pity that the paper is not published in a Journal which is widely read by reconstructive surgeons (eg JPRAS) or surgeons working in Africa (eg E&C African Journal of Surgery) where it would have the maximum impact.
