Reviewer’s report

Title: A simple way to distinguish bed clothing contamination in whole body bone scan ; a case report

Version: 2 Date: 18 August 2007

Reviewer: Timothy B Gilbert

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General

[1] Spell out Technetium, instead of Tc, in its first instance & in abstract.
[2] Specifically define which individuals provided written informed consent, i.e., the technicians and/or the patients.
[3] Review reference formatting for proper style. (e.g., AMA Handbook of Style, etc,...).
[4] Hopefully, the authors can provide the best quality reproduction of the whole body scan.

Revisions necessary for publication

What next?: Accept after minor revisions

Quality of written English: Needs some language corrections before being
published
