Reviewer's report

Title: Acute Panuveitis with Hypopyon in Crohns Disease - An Effect of Medical Therapy

Version: 1 Date: 28 April 2007

Reviewer: Ben Burton

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unreported or unusual side effects or adverse interactions involving medications

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General
Would be good to have results of any other blood test results - particularly FBC, ESR and CRP - do they shed any light on whether this is more likely a reactivation of Crohns or an adverse drug reaction? This would make the paper more informative
