Reviewer's report

Title: Adult brain abscess associated with patent foramen ovale: Case report.

Version: 2 Date: 16 July 2007

Reviewer: Kuo-Chin Huang

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Findings that shed new light on the possible pathogenesis of a disease or an adverse effect

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

The manuscript is well written and their result is quite interesting. As they mentioned in text, however, more cases will be needed for further implication in clinical practices.

What next?: Accept

Quality of written English: Acceptable
