Reviewer's report

**Title:** Spontaneous regression of metastatic renal cell carcinoma: case report

**Version:** 2  **Date:** 19 July 2007

**Reviewer:** Ching-Yu Chen

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

**Has the case been reported coherently?** Yes

**Is the case report authentic?** Yes

**Is this case worth reporting?** Yes

**Is the case report persuasive?** No

**Does the case report have explanatory value?** Yes

**Does the case report have diagnostic value?** Yes

**Will the case report make a difference to clinical practice?** No

**Comments to authors:**

**General**

Spontaneous remission of multiple hematogenous lung lesions after rt nephrecomy of renal cell carcinima in a 60 years old male patient with myelfibrosis was presented. This unusual case will be more persuasive with the following evidences:

1. Pathologic proof of lung lesions.
2. Chest CT findings before and after remission.
3. Improving abnormal laboratory findings realted to remission.

Without the evidences, the article title might be revised as "Suspected" spontaneous remission.
