Reviewer's report

Title: Prolonged Gastroparesis after corrective surgery for Wilkie's Syndrome: A Case Report.

Version: 4 Date: 22 January 2008

Reviewer: Thilo Welsch

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Comments to authors:

The authors answered the reviewer's questions appropriately and provided additional information. But still, we do not learn a lot from the present case, except that there might be prolonged gastroparesis after Wilkie's syndrome. The case will not lead to a change in management in future.

What next?: Accept

Quality of written English: Acceptable
