Reviewer’s report

Title: Bronchial obstruction secondary to idiopathic scoliosis in a child. A case report.

Version: 3 Date: 9 October 2007

Reviewer: mohammed almarri

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unreported or unusual side effects or adverse interactions involving medications

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General
i believe this case is deserter to be published and i have some comments as fellow:
1. title : Air Flow obstruction secondary to Bronchial torsion in idiopathic scoliosis (would be more realist even though current title is responsible)
2. refrences need to have all the authors names not only the first two authors.(e.g 5.WJ, K., Scoliosis prevalence: a call for a statement of terms. Clin Orthop, 1977. 126: p. 43-6.
