Reviewer’s report

Title: Use of intravitreal bevacuzimab in a patient with a Von Hippel Lindau associated retinal haemangioblastoma of the optic nerve head: a case report.

Version: 4 Date: 23 January 2008

Reviewer: Nathan Radcliffe

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Presentations, diagnoses and/or management of new and emerging diseases

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

This article represents exactly what JMCR is looking for - firstly, presentation of a very interesting and challenging (as well as rare) case, which is described very well by the authors. Next, the use of an innovative treatment strategy after standard of care has failed. And finally, a very thoughtful discussion of why the patient responded to the treatment in a particular way. This article should be accepted without revision.

What next?: Accept

Quality of written English: Acceptable
