Title: Single Ventricle with Persistent Truncus Arteriosus: A Case Report of Two Rare Entities in an Adult Patient

Version: 5 Date: 23 January 2008

Reviewer: Solly Levin

Comments to authors:

Re: Title: Single ventricle with Persistent Truncus Arteriosus: A case report of two rare entities in an adult patient.
Authors: Ian Porter and James L. Vacek.

I have read through their version dated: 3 January 2008.THIS IS MUCH IMPROVED.
They have dealt with my comments to them.
The case meets 1 of the 7 criteria viz. Unexpected or unusual presentation of a disease.
The case has been reported coherently. It appears to be authentic and is worth reporting. The quality of the written English is acceptable.
