Reviewer's report

**Title:** Bilateral anterior cerebral artery territory infarction presenting as an intra-cranial tumour: a case report

**Version:** 1 **Date:** 18 October 2007

**Reviewer:** David Tong

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

**Has the case been reported coherently?:** Yes

**Is the case report authentic?:** Yes

**Is this case worth reporting?:** Yes

**Is the case report persuasive?:** Yes

**Does the case report have explanatory value?:** Yes

**Does the case report have diagnostic value?:** Yes

**Will the case report make a difference to clinical practice?:** Yes

**Comments to authors:**

General

---------------------------------------------------------------------------------------------------------------

**Revisions necessary for publication**

Show the MRI result. It is unusual that the MRI is neg, esp if DWI (diffusion imaging) is used. comment that other imaging (such as CT angiography or CT Perfusion) could have made the diagnosis more acutely.

what was timing between symptom onset and pt ct scan. Comment on why ct was positive at this time point (presumably very acute (ie <8h) after sx onset.

**What next?:** Revise and resubmit

**Quality of written English:** Acceptable
