Reviewer’s report

Title: Decrease in tobacco consumption after treatment with topiramate and aripiprazole

Version: 4 Date: 6 February 2008

Reviewer: Ömer Geçici

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: New associations or variations in disease processes

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

Firstly, the authors said that the patient has taken haloperidol. We know that some patients may smoke more than before the medication to decrease the side effects of antipsychotic. The authors did not discuss this situation and inform about haloperidol medication.

Secondly, did the authors get ethically the permission from patients and his family to publish his information?

What next?: Accept after minor revisions

Quality of written English: Acceptable
