Reviewer’s report

Title: Acute lethal intestinal gas gangrene of a 12 months old child after long-standing artificial nutrition as a cause of Pneumatosis coli: a case report

Version: 2 Date: 20 November 2007

Reviewer: Chong Tae T Kim

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General
Check words and grammar before publication.

Revisions necessary for publication

Medication is one of causes of PC. Need details of artificial nutrition (what kind of feeding, and nutritional facts, how often feeds, etc...).

What next?: Accept after minor revisions

Quality of written English: Needs some language corrections before being published
