Reviewer’s report

Title: Achondroplastic girl manifesting enchondromatosis and ossification of the spinal ligaments

Version: 7 Date: 28 March 2008

Reviewer: Gen Nishimura

I am familiar with the literature and believe that this case meets one of the 9 criteria for evaluation in the journal: New associations or variations in disease processes

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

Discussion about the unusual combination of ACH, metaphyseal dysplasia, and spinal ankylosis has been almost settled. This report is acceptable. However, I would like ask the author that the manuscript should be checked by a native speaker.

Quality of written English: Needs some language corrections before being published

Declaration of competing interests:

No competing interests.
