Reviewer's report

Title: Giant Prostatic Adenocarcinoma--Case Report and Review of Literature

Version: 2 Date: 29 June 2007

Reviewer: Antonio Lopez-Beltran

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Comments to authors:

General
The paper describes an unusual case of Giant Carcinoma of the prostate. The case report is well written, easy to follow and of interest for the practitioner. Some minor issues might be added to improve the paper.

-------------------------------------------------------------------------------

Revisions necessary for publication
1. For how long was the patient treated with tamsulosin
2. The patient received androgen blockade before was lost to follow up. It was during this short time any measurement on the effect of therapy, if not, this should be stated since it probably means that we do not have real information on the utility of using such therapy in these cases.

What next?: Accept after minor revisions

Quality of written English: Acceptable
