Reviewer's report

Title: Bezoar in gastro-jejunostomy presenting as gastric outlet obstruction: case report and review of the literature

Version: 2 Date: 22 June 2008

Reviewer: Serafino Vanella

I am familiar with the literature and believe that this case meets one of the 9 criteria for evaluation in the journal: Findings that shed new light on the possible pathogenesis of a disease or an adverse effect

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The case presentation and the conclusions of the authors are very interesting. They realized a good review the literature. Previous gastric surgery can increase the risk of formation of bezoar and it should be suspected in these at-risk patients.

Quality of written English: Acceptable
