Reviewer's report

Title: Delayed Diagnosis of Intermittent Mesenteroaxial Volvulus of the Stomach by Computed Tomography: A Case Report

Version: 3 Date: 8 April 2008

Reviewer: Tokihiko Sawada

I am familiar with the literature and believe that this case meets one of the 9 criteria for evaluation in the journal: Other

If other, please specify:

The case was very rare, and was comprehensively written.

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The manuscript reported the rare case of gastric volvulus. The paper well-wirtten, however, the authors should add intraoperative picture of the patient and figure describing operative procedure. Also, authors should add more comments on the etiology of primary gastric volvulus in discussion section.

Quality of written English: Acceptable
