Title: First isolation of Two colistin-resistant Emerging Pathogens, Brevundimonas diminuta and Ochrobactrum anthropi, in a Cystic Fibrosis Patient: a Case Report

Version: 5 Date: 6 June 2008

Reviewer: Matthew E Falagas

Comments to authors:

In brief, I recommend acceptance of the manuscript for publication in the journal after a minor revision. I suggest that the authors add details regarding the statement of resistance of the isolates to colistin (page 4, line 17, and page 4, line 21), at least the MICs. Also they may further improve the language of the case report (for example write on page 3, lines 22-23: "There was no pleural effusion" instead of "There was any pleural effusion").
