Reviewer’s report

Title: Heterotopic pregnancy following ovulation induction by Clomiphene and a healthy live birth: a case report

Version: 5 Date: 17 June 2008

Reviewer: Maryam Kashanian

I am familiar with the literature and believe that this case meets one of the 9 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Many thanks for reporting this interesting case report. All gynecologists and doctors should think about the probability of an ectopic pregnancy even if an intrauterine pregnancy exists, and have in their mind that it can not always rules out an ectopic pregnancy. However, I think that the report may be shortened because some parts are repetitive.
