Reviewer’s report

Title: Case Report: Papillary carcinoma arising in thyroglossal duct cyst with cervical lymph node metastasis and microcarcinoma in the thyroid

Version: 6 Date: 24 August 2007

Reviewer: Izumi Takeyoshi

I am familiar with the literature and believe that this case meets one of the 7 criteria for evaluation in the journal: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Comments to authors:

General
This case report has been revised and changed to be better. The new title has changed to be better especially, because the coincidence of papillary carcinoma arising in thyroglossal duct and that in the thyroid gland is very rare. So I think this paper can be accepted in our journal.

If possible, quote such case reports as you have reported and discuss in this paper.

Revisions necessary for publication

What next?: Accept

Quality of written English: Acceptable
