Reviewer's report

Title: Pelvic digit as a rare cause for chronic hip pain and functional impairment: a case report

Version: 2 Date: 19 January 2009

Reviewer: Mahmut Nedim N Aytekin

Which of the following best describes what type of case report this is?: An unexpected association between diseases or symptoms

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

Thank you for writing this interesting case. I would like you to make some minor revisions on your paper.

1. Case Presentation part is not so detailed. For example; History of "no trauma" should be emphasized.

2. On the seventh line of the Discussion Part "63-old" should change as "63-year-old"

3. Last sentence of the first paragraph of the discussion part should be reviewed for English grammar.

4. 4th paragraph of the Discussion; Fong's Disease could be explained in one sentence or could be deleted.
Quality of written English: Needs some language corrections before being published
