Reviewer's report

Title: A survivor of childhood medulloblastoma presenting with growth hormone-induced edema and inflammatory lesions: case report.

Version: 3 Date: 13 May 2008

Reviewer: Mohamed Fahmy

I am familiar with the literature and believe that this case meets one of the 9 criteria for evaluation in the journal: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

There are a lot of abbreviations which deserve an explanation in the start of manuscript.

There are some correction needed in the main text “highlighted”

Also there are statements in the conclusion need references.

I think it will be more worthy if the authors can provide an extra image of the excised tumor or even a histological picture.

Quality of written English: Needs some language corrections before being published
