Comments to authors:

This is a very interesting case report of a rare obstetric situation that needs to be mention.

Few revisions are needed for publication:

1) I don't think that the word "secondary" is absolutely necessary in the title, in the abstract and in the introduction

2) ABSTRACT
   - The sentence in the case part beginning with "Pre-operatively..." needs to be reviewed and shortened

3) CASE:
   - Was the beginning of the pregnancy normal? (1st trimester ultrasound, clinical
- Did the patient have a previous gynecological survey and ultrasound?
- Was amniotic fluid amount normal in the 22 weeks ultrasound?
- Did the hospital perform another ultrasound examination before discharging the patient?
- I'm not sure that the figure is necessary. By the way, it is not mentioned in the case.

4) DISCUSSION
- Reference number should be reviewed
- You should present the other case found in literature and explain how the diagnosis was made in those cases.
- I don't understand the difference between the two sentences of the second § beginning with "In spite..." and "Incidence..."? Isn't it the same idea?
- The sentence just after that beginning with "Abnormal..." is beyond understanding. You should separate it and make it clearer.

After these few revisions, I think this work is worth publishing.
