Reviewer's report

Title: An unusual variant of Choledochal Cyst: A case report

Version: 6 Date: 9 September 2008

Reviewer: Mohamed Fahmy

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The text in general is too short for publication and to give full description of the case.

The authors need to elaborate more in investigations of the baby before reach to the final diagnosis.

If the authors can provide a picture of the antenatal ultrasound it will be valuable.

The given figures are not legend.

Fig 2 is not clear and of poor quality

Quality of written English: Acceptable
Declaration of competing interests:
