Title: Right-Sided Bochdalek Hernia in an Adult: A Case Report

Version: 2 Date: 21 December 2008

Reviewer: Martin Maaroos

Which of the following following best describes what type of case report this is?: Other

If other, please specify:
rare clinical condition in adults. successfully diagnosed and treated

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:
In the report you say that hernia was treated via thoracotomy and assisted by laparoscopy. My opinion is that little more detailed classification of the surgical procedure is needed: name of operation, for example patch hernioplasty e.c. Tecnique of operation was described correctly.

Quality of written English: Acceptable
