Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting report of a case of right Bochdalek Hernia in a woman the report is well described abd extensively discussed. However, in the discussion section the diagnostic tools and the relationship between endometriosis and symptomatic Bochdalek Hernia should be more detailed. Finally the possibility of a thoracoscopic approach should be discussed underlining the reason of the choice of thoracotomy in this case.

Quality of written English: Acceptable
