Reviewer’s report

Title: Atrial Myxoma Presenting with Orthostatic Hypotension: a case report

Version: 3 Date: 12 November 2008

Reviewer: Hutan Ashrafian

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

1) The manuscript needs to explicitly state the mechanism of the orthostasis in this case. For example do they believe the orthostasis was due to LV inflow blockage as in the other case that they describe? This need to be mentioned in conjunction with the echocardiographic findings.

2) The referencing is inaccurate. For example reference 4 in the Discussion is actually reference number 5. The references need to be improved.

3) The English in the manuscript needs improving.

Quality of written English: Needs some language corrections before being published
