Reviewer's report

Title: Pseudoinfarction pattern in a patient with hyperkalemia, diabetic ketoacidosis, and normal coronary vessels: a case report

Version: 1 Date: 29 June 2009

Reviewer: Dimitri P Mikhailidis

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

What happened to CK and CK-MB values - were they measured? In the second sample you describe, had the acidosis resolved?

Quality of written English: Needs some language corrections before being published
