Reviewer’s report

Title: Post-viral polyneuropathy with parasympathetic dysautonomia in a child: a case report

Version: 6 Date: 10 June 2009

Reviewer: Gabriele Arendt

Which of the following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is an interesting case which is adequately presented. But before the article should be published in JMCR the authors should provide results of electrophysiological tests like neurography and CSF results as well as they should comment on the patient’s outcome.

Quality of written English: Acceptable
