Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

This is a well written case report, there are a few typos e.g loose instead of lose. It is an unusual manifestation of FMD and this is worthwhile to bring to the attention of your readers. The discussion is too long and becomes a minireview. The authors should focus on the complication of thrombosis and renal infarction and perhaps speculate on the reasons.

Quality of written English: Acceptable
