Comments to authors:

The case report was well-written, didactic and including almost no mistakes except two points.

1. I could not see the place of the figures in the text. The authors should place them.

2. In the 2nd paragraph of discussion, in 4th sentence FMD is misspelled (FDM). It should be corrected.

The figures were also well-illustrated. I think after minor revision that I pointed above, it can be publish.
Kindest regards
