Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

• General comments
  This article is an interesting case report with a rather good review of PPNAD and Carney complex.

• Revisions necessary for publication
  1. About the abstract, the content in case presentation is enough for the abstract, the introduction and the conclusion is unnecessary repetition.
  2. The author should add the detail of gross findings and histological characteristics of the adrenal glands.
  3. Table 1, add the normal value of plasma cortisol
  4. Misspell: page 5 row 14, endrocrinology - endocrinology
Quality of written English: Acceptable
