Reviewer's report

Title: Neurofibromatosis type 1 (von Recklinghausen's Disease) with duodenal GIST that was difficult to distinguish from pancreatic neuroendocrine tumor: a case report

Version: 1 Date: 8 December 2009

Reviewer: George Sakorafas

Comments to authors:

English=needs improvement (major revision)

Partial jejunostomy. The authors probably mean segmental jejunostomy

The authors should note at the end of case presentation the length of follow-up

…We carefully examined this lesion… (discussion) probably the authors mean …region (area)…
