Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

The description that Some fine neurites made contact with the ERM (Figure 5), must be improved. It is very difficult to see the contact area between the neurites and the ERM. They are close to each other.

Quality of written English: Acceptable
