Reviewer's report

**Title:** Long-Term Survival of a Patient with Well Differentiated Papillary Mesothelioma of the Peritoneum: Case Report and Review of the Literature

**Version:** 1  **Date:** 26 January 2010

**Reviewer:** Christelle Clement-Duchene

**Which of the following following best describes what type of case report this is?** None

**Has the case been reported coherently?** Yes

**Is the case report authentic?** Yes

**Is the case report ethical?** Yes

**Is there any missing information that you think must be added before publication?** Yes

**Is this case worth reporting?** Yes

**Is the case report persuasive?** Yes

**Does the case report have explanatory value?** Yes

**Does the case report have diagnostic value?** Yes

**Will the case report make a difference to clinical practice?** No

**Is the anonymity of the patient protected?** Yes

**Comments to authors:**

The authors wrote a very good case report on papillary mesothelioma of the peritoneum. The manuscript is very nice to read and the authors have included relevant references in this field.

Perhaps, the authors could add some figure of CT and histology in order to improve the quality of the manuscript.

**Quality of written English:** Acceptable
