Reviewer's report

Title: Coffin Siris Syndrome with Mayer-Rokitansky-Kuster-Hauser syndrome

Version: 2 Date: 18 May 2010

Reviewer: Bushra Afroze

Which of the following best describes what type of case report this is?: New associations or variations in disease processes

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Including MRI pelvis of the described patient showing absent vagina, uterus and fallopian tubes, the classical features of Mayer-Rokitansky-Küster-Hauser syndrome would be interesting and would be important to demonstrate the association, which has not been described before.

Quality of written English: Acceptable
