Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

In general ,this case report is written in a very good way regarding the history,way of mangement to reach the diagnosis,searching in literature and the tests of the histo-chemistry.

As urologist ,I consulted our pathologist regarding chemistry tests and admitted that they were very good enough to reach the diagnosis.

Specifically I was impressed that the auther traced the cases in the literature and how they are listed.

this case shoud be published becouse it shoud be known that this rare disease,inspite of its usual manifistation can come in any age and in any place so the physicion as well the pathologist should think of these rare cases.
Quality of written English: Acceptable
