Reviewer's report

Title: Abscopal effect of radiation on lung metastases of hepatocellular carcinoma - A case report

Version: 2 Date: 28 June 2010

Reviewer: Victor Lee

Which of the following following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

It may appear that the two right lung metastases are within the left-right parallel opposing beams as it has not been shown clearly in the figures.

Please kindly provide additional pictures/figures to prove that the lung metastases are outside the radiation field of the two left-right parallel opposing fields.

Quality of written English: Needs some language corrections before being published
