Reviewer's report

Title: Neurology Case Reporting: A call for all.

Version: 1 Date: 14 January 2011

Reviewer: Geoff Wong

Comments to authors:

Thanks for sending me this editorial.

I read it with interest and am happy to say that it makes some points about case reports that have been raked over in the past, but also has a novel and interesting section in it about patients and case reports (bottom p5/top page 6). Because of this section, it is definitely worth considering and I would recommend that we ACCEPT this manuscript as is.

I found only one typo (first line of the second paragraph on page 5):
"Whereas the love for of the neurologic case...." either the for or of needs to be deleted.
