Reviewer's report

Title: Unilateral, complex (four part), diaphyseal fracture of the radius with ipsilateral mid-shaft ulna fracture in an adult: a case report

Version: 1 Date: 17 June 2010

Reviewer: Asheesh Sood

Which of the following following best describes what type of case report this is?: Unexpected or unusual presentations of a disease

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

1) I would like to see a lateral view of the forearm in figure 3.
2) The authors have not commented on whether they intend to leave the metal work in or remove it future. Perhaps this could be included in the discussion.

Quality of written English: Acceptable
