Reviewer's report

Title: Acute appendicitis caused by endometriosis: A case report

Version: 1 Date: 6 October 2010

Reviewer: Konstantinos Milias

Which of the following following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: No

Is this case worth reporting?: No

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: No

Comments to authors:

1. Too extensive text in "Discussion". There is no need for such explanation of the different theories of endometriosis.
2. Bad quality of English in several occasions. The authors seem to translate greek in english and not write in english (e.g. pathologic assessments, "she ahd no fever, But nausea..., McBurney’s point)
3. I reckon that is unavailing describing in details how to manage an acute apendicitis.

Quality of written English: Needs some language corrections before being published
