Reviewer's report

Title: A case report of the effect of the dual endothelin receptor antagonist, bosentan, on untreatable ulcers in a diabetic patient

Version: 2 Date: 26 April 2010

Reviewer: Antonio Giovanni Richetta

Which of the following best describes what type of case report this is?: An unexpected event in the course of observing or treating a patient

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes

Comments to authors:

Authors underlying the beneficial role of bosentan in diabetic patients. The article has been written in a clear and correct way, integrating the findings with the research literature.

I suggest to put in the references articles regarding the role of bosentan in sclerodermic ulcers.

Quality of written English: Acceptable
