Is the case report persuasive?: No

Does the case report have explanatory value?: Yes

Does the case report have diagnostic value?: No

Will the case report make a difference to clinical practice?: No

Is the anonymity of the patient protected?: Yes

Comments to authors:

The possibility of an early detection of malignant transformation of hemangioma to treat the sarcoma in his early stage seems interesting. The problem could be how to do the follow up of multiple hemangioma located also in the internal organs, how to analyze their histology, and which one to decide to biopsy. Considering the case and his description is interesting to read and learn something about this rare syndrome.
