Reviewer's report

Title: A dentigerous cyst associated with bilaterally-impacted mandibular canines: a case report

Version: 1 Date: 26 October 2010

Reviewer: Rumpa Ganguly

Which of the following best describes what type of case report this is?: Other

If other, please specify:

The article discusses a case of a very commonly occurring odontogenic cyst extensively discussed in dental/oral and maxillofacial journals. The article discusses a less common presentation of the lesion. This information will add value to the medical literature as many of the these lesions may appear as incidental findings on imaging studies requested by medical professionals for other indications.

Has the case been reported coherently?: Yes

Is the case report authentic?: Yes

Is the case report ethical?: Yes

Is there any missing information that you think must be added before publication?: Yes

Is this case worth reporting?: Yes

Is the case report persuasive?: Yes

Does the case report have explanatory value?: No

Does the case report have diagnostic value?: Yes

Will the case report make a difference to clinical practice?: Yes

Is the anonymity of the patient protected?: Yes
